

MUHAMMAD ABDULLAH ABRAR

Full-Stack Developer · Firebase · Mobile (Flutter/Android) · CS @ Bahria University

Islamabad, PK · mabdullahabrar21@gmail.com · +92 330 5636472 · linkedin.com/in/mabdullahabrar · github.com/mabdullahabrar

PROFESSIONAL SUMMARY

Motivated CS undergraduate at Bahria University (**CGPA 3.60 / 4.00**) with **two consecutive internships** delivering production-grade applications for real clients. Proficient in **Angular, Node.js, REST APIs, SQL Server**, and **Firebase** (Auth, Firestore, Storage, Cloud Functions, FCM). Built a full cross-platform mobile app in Flutter and an AI/ML-integrated compiler tool. Strong foundations in OOP, Agile/Scrum, database design, and machine learning fundamentals. Ships real work, picks up new stacks fast, and communicates clearly with cross-functional teams.

TECHNICAL SKILLS

Languages	Python · JavaScript · Dart · SQL · C++
Frontend	React · Angular · Flutter · HTML5 · CSS3 · Responsive & Mobile-First UI
Backend	Node.js · Express.js · Flask · REST API Design & Integration
Firebase	Authentication · Firestore · Cloud Storage · Cloud Functions · Cloud Messaging (FCM)
AI / ML	Scikit-learn · Pandas · NumPy · Text Classification · Model Training & Prediction
Databases	SQL Server · MongoDB · Firestore · Schema Design · Query Optimisation
DevOps/Tools	Git · GitHub · CI/CD Concepts · Android Studio · Xcode · VS Code
Core Concepts	OOP · DSA · SDLC · Agile/Scrum · Networking Fundamentals · OS Fundamentals

PROFESSIONAL EXPERIENCE

IT Intern — PAF Hospital, Islamabad

Jul – Aug 2025

- Engineered Angular + REST API healthcare web apps used daily by clinical staff, improving patient management workflows across multiple hospital departments.
- Designed SQL Server schemas and built automated dashboards that eliminated manual data retrieval and directly reduced daily admin overhead.
- Elicited requirements from medical and IT stakeholders; delivered iterative releases inside a compliance-sensitive, regulated healthcare environment.

Web Development Intern — Rhombix Technologies

Jul – Sep 2025

- Delivered responsive Angular/CSS3 frontends for client-facing products; resolved 20+ production bugs via systematic debugging and peer code review.
- Built Node.js/Express REST endpoints and Firebase-backed features; maintained CI feedback loops within full Agile sprint cycles.
- Owned feature scoping end-to-end translated ambiguous client briefs into shipped, tested code delivered on schedule.

PROJECTS

Campus Connect — Mobile Development

Flutter · Dart · Firebase · flutter_map

- Cross-platform student companion app (Android + Windows) centralising chat, deadlines, notes, events, and GPA tracking; led application architecture and implemented authentication, dashboard, and GPA modules.
- Built Firebase Authentication with role-based access (Student/CR/Admin) and real-time sync across all screens via Firestore Stream-Builders zero polling, zero manual refresh.

Flow2Code Compiler — AI / Machine Learning

Python · Scikit-learn · Flask · React.js

- Generated Python, C, and C++ code from user-created flowcharts using a Flask-based compiler engine and React frontend, combining AI, ML, and full-stack development in one system.
- Built a Scikit-learn text classification model supporting AI-assisted flowchart generation dataset preprocessing, feature extraction, and model training/prediction with Groq SDK integration for AI generation.

Hospital Staff Training System — Full-Stack Development

Angular · Node.js · SQL Server · REST APIs · Firebase

- Full-stack healthcare training portal with role-based access control via Firebase Auth, categorised medical resources, and video streaming for 100+ hospital staff.
- Designed RESTful backend endpoints and optimised SQL Server schema to ensure secure, scalable content delivery under concurrent load.

EDUCATION

BS Computer Science — Bahria University, Islamabad

2023 – 2027 (Expected)

CGPA: 3.60 / 4.00 · Coursework: DSA, OOP, Database Systems, Computer Networks, OS, Mobile App Development, Machine Learning

Intermediate ICS — Bahria College, Islamabad

2022 – 2023

IGCSE Computer Science — Mutiara International Grammar School, Malaysia

2019 – 2021

CERTIFICATIONS

- HP LIFE:** Data Science & Analytics · AI for Beginners · Cybersecurity Awareness
- Sololearn:** Angular Development · Web Development with JavaScript
